

Parian Spirit brush cleaner

Cleaning

Parian Spirit is made from citrus spirits and food grade solvents, giving it powerful cleaning properties that cut through oil-base makeup and adhesives but remains gentle to natural bristles. Just insert your used brushes in a Parian Spirit portable canister and gently agitate and watch the makeup and residue settle to the bottom of the container. Parian Spirit is also good for cleaning makeup off clothes, wigs, false eyelashes and false facial hair.

Conditioning

After removing the oils from your natural hair bristles, Parian Spirit reconditions and returns them to their natural sheen and luster, leaving a pleasant citrus aroma.

Disinfecting

After extensive anti-bacterial lab tests, it was found that Parian Spirit had the strongest disinfecting properties among all of the leading makeup brush cleaners. It takes approximately 1 minute of immersion to disinfect a brush thoroughly. Sprays are not as effective in disinfecting. That is why we recommend soaking your brushes at the end of the day in a Parian Spirit immersion tub.

Drying Time

The time it takes for a brush to completely dry will vary from the type of brush, the bristles, the thickness of the brush and the temperature and humidity of the room. In general Parian Spirit is a moderately fast-drying cleaner. To speed up the drying time and reduce oiliness use an absorbent material such as terry cloth or a paper towel to soak up all the moisture. Then quickly roll the brush between your palms to help circulate air through the brush. When drying time is limited and a brush needs to be cleaned and reused immediately, use the 4 oz. spray bottle.

4 oz Sprayer

The spray bottle is designed for quick cleaning of large powder brushes when drying time is limited. Give the brush a fine mist spray, but do not soak it. Use a terry cloth or paper towel for drying. The sprayer is also great for cleaning counter tops, makeup cases, etc.

Portable Canister

This small tub is designed to fit conveniently into a makeup carrying case. It has features which make cleaning brushes easy. A porous rubbing screen on a riser allows makeup and debris to fall to the bottom of the canister, away from the brush. Cleaning your canister is easy. All of the parts come out and can be wiped clean with a paper towel or rag to be filled and used again. Fill tube only enough to cover the bristles of your brush.

Wigs and Pieces

Cleaning makeup and adhesives from fronted and /or ventilated wigs, false facial hair and false eyelashes is a breeze with Parian Spirit. Using a short hard bristled brush (toothbrush) gently rub Parian Spirit on the lace using a terry cloth or paper towel under it. Spraying Parian Spirit directly on the lace of the hair piece can be as affective as dipping the brush. In case of hardened adhesives and /or built up makeup, soak the hairpiece in Parian Spirit and repeat brushing technique.
